

CHAOS, SOLITONS & FRACTALS
applications in science and engineering

VOLUME 4 CONTENTS

VOLUME 4 NUMBER 1

1994

Chaos and Order in Symbolic Sequences

M. S. El Naschie	1	Editorial
W. Ebeling	3	Preface
K. Young and J. P. Crutchfield	5	Fluctuation spectroscopy
G. Nicolis and P. Gaspard	41	Toward a probabilistic approach to complex systems
D. MacKernan	59	Sensitive response to time dependent perturbations and spectral properties of deterministic chaos
V. S. Anishchenko, W. Ebeling and A. B. Neiman	69	Power law distributions of spectral density and higher order entropies
B. Pompe	83	On some entropy methods in data analysis
H. Herzel, A. O. Schmitt and W. Ebeling	97	Finite sample effects in sequence analysis
B. Schapiro	115	An approach to the physics of complexity
O. E. Rossler	125	Fraiberg-Lenneberg speech
R. Wackerbauer, A. Witt, H. Atmanspacher, J. Kurths and H. Scheingraber	133	A comparative classification of complexity measures
	175	Announcement
	I	Erratum

VOLUME 4 NUMBER 2

1994

M. S. El Naschie	177	Is quantum space a random Cantor set with a Golden Mean dimension at the core?
R. Radha and M. Lakshmanan	181	Multisoliton generation in inhomogeneous nonlinear Schrödinger and Heisenberg spin systems

M. Ovidiu Vlad	191	Fractional diffusion equation on fractals: self-similar stationary solutions in a force field derived from a logarithmic potential
N. F. Rul'kov, A. R. Volkovskii, A. Rodriguez-Lozano, E. Del Rio and M. G. Velarde	201	Synchronous chaotic behaviour of a response oscillator with chaotic driving
R. Kosecki	213	Algebraic characterization of the KdV family
M. F. Jørgensen and P. L. Christiansen	217	Hamiltonian structure for a modified discrete self-trapping dimer
S. Tasaki, I. Antoniou and Z. Suchanecki	227	Spectral decomposition and fractal eigenvectors for a class of piecewise linear maps
E. Del Rio, A. Rodriguez-Lozano and M. G. Velarde	255	Melnikov's criterion and its experimental test using a nonlinear oscillator
R. Nabergoj, A. Tondl and Z. Virag	263	Autoparametric resonance in an externally excited system
M. A. Davies and F. C. Moon	275	Transition from soliton to chaotic motion during impact of a nonlinear elastic structure
M. Szydłowski, J. Szczęsny and A. Krawiec	285	Qualitative chaos in galactic models
M. S. El Naschie	293	On certain "empty" Cantor sets and their dimensions
<i>Short Note</i>		
M. Wiercigroch	297	Bifurcation analysis of harmonically excited linear oscillator with clearance
	305	Announcements
	I	Sample layout for camera-ready copy submission

VOLUME 4 NUMBER 3

1994

Quantum Mechanics and Chaotic Fractals

M. S. El Naschie and O. E. Rossler	307	Foreword
T. Petrosky and I. Prigogine	311	Quantum chaos, complex spectral representations and time-symmetry breaking
L. Nottale	361	Scale relativity, fractal space-time and quantum mechanics

A. Le Méhauté, F. Héliodore, D. Cotteville and F. Latreille	389	Introduction to wave phenomena and uncertainty in a fractal space—I
M. S. El Naschie	403	Young double-slit experiment, Heisenberg uncertainty principle and Cantorian space-time
E. Alvarez, J. Cespedes and E. Verdaguer	411	The quantum dimension of space-time
O. E. Rossler	415	Intra-observer chaos: hidden root of quantum mechanics?
M. Conrad	423	Amplification of superpositional effects through electronic-conformational interactions
D. W. Belousek, E. Henigin, D. Hott and J. P. Kenny	439	Quantum cellular automaton in 1-D
M. Giona	461	An energy-barrier model of biased transport in disordered systems
S. E. Rugh	471	Chaos in the Einstein equations
	495	Announcement

VOLUME 4 NUMBER 4

1994

Nonlinear Dynamics in Urban and Transportation Analysis

D. S. Dendrinos	497	Preface—Nonlinearities, interdependent dynamics and interacting scales; progress in urban and transportation analysis
W. Weidlich	507	Settlement formation at the Meso-scale
G. Haag	519	The rank-size distribution of settlements as a dynamic multifractal phenomenon
M. Sonis	535	Calculus of iterations and labor-capital core-periphery relative redistribution dynamics
J. B. Rosser Jr	553	Dynamics of emergent urban hierarchy
R. White and G. Engelen	563	Urban systems dynamics and cellular automata: fractal structures between order and chaos
J. F. Kaashoek and J. H. P. Paelinck	585	On potentialized partial differential equations in theoretical spatial economics
Wei-Bin Zhang	595	Dynamics of interacting spatial economies

D. S. Dendrinos

605 Traffic-flow dynamics: a search for chaos

619 Announcement

VOLUME 4 NUMBER 5

1994

P. Ashwin, P. Chossat and I. Stewart

621 Transitivity of orbits of maps symmetric under compact Lie groups

R. Günther, B. Schapiro and P. Wagner

635 Complex systems, complexity measures, grammars and model-inferring

E. Gozzi

653 Counting periodic trajectories via topological classical mechanics

R. W. Leven, M. Selent and D. Uhrlandt

661 Fractal dimensions and $f(\alpha)$ spectrum of chaotic sets near crises

A. Buragohain, H. Bailung, B. K. Sarma, J. Chutia and Y. Nakamura

677 Chaotic attractors in ion-beam plasma system

F. H. Ling

681 Interpolated Poincaré map and application to mixing problems

Xinyu He

693 On the evolution equation of an inviscid vortex in 2-D turbulence

T. Nakao and M. Wadati

701 Higher-order Davey–Stewartson equations

L. B. Levitin and Z. Reingold

709 Entropy of natural languages: theory and experiment

VOLUME 4 NUMBER 6

1994

Chaos Applied to Fluid Mixing

H. Aref

745 Chaotic advection in perspective

D. Beigie, A. Leonard and S. Wiggins

749 Invariant manifold templates for chaotic advection

M. Liu, F. J. Muzzio and R. L. Peskin

869 Quantification of mixing in aperiodic chaotic flows

K. Bajer	895	Hamiltonian formulation of the equations of streamlines in three-dimensional steady flows
A. J. Szeri and L. G. Leal	913	Orientation dynamics and stretching of particles in unsteady, three-dimensional fluid flows: unsteady attractors
S. W. Jones	929	Interaction of chaotic advection and diffusion
P. E. Hydon	941	Resonant and chaotic advection in a curved pipe
Hsueh-Chia Chang and M. Sen	955	Application of chaotic advection to heat transfer
V. V. Meleshko and G. J. F. van Heijst	977	Interacting two-dimensional vortex structures: point vortices, contour kinematics and stirring properties
S. P. Beerens, H. Ridderinkhof and J. T. F. Zimmerman	1011	An analytical study of chaotic stirring in tidal areas
M. Tabor and I. Klapper	1031	Stretching and alignment in chaotic and turbulent flows
K. B. Southerland, R. D. Frederiksen, W. J. A. Dahm and D. R. Dowling	1057	Comparisons of mixing in chaotic and turbulent flows
R. T. Pierrehumbert	1091	Tracer microstructure in the large-eddy dominated regime
R. T. Pierrehumbert, I. M. Held and K. L. Swanson	1111	Spectra of local and nonlocal two-dimensional turbulence
VOLUME 4 NUMBER 7		1994
E. Gozzi and M. Reuter	1117	Lyapunov exponents, path-integrals and forms
M. S. El Naschie	1141	Renormalization semi-groups and the dimension of Cantorian space-time
R. Engbert and F. R. Drepper	1147	Chance and chaos in population biology—models of recurrent epidemics and food chain dynamics
J. Messer	1171	Nonlinear network dynamics, stability and growth in ecosystems
Xinyu He	1183	The most probable critical distance for two unequal vortices in two-dimensional turbulence

J. Brindley, K. Kaneko and T. Kapitaniak	1193	Spatio-temporal chaos in closed and open systems
B. S. Tošić and Lj. D. Mašković	1211	Equivalent Hamiltonian method in coherent solitons theory
Wei-Mou Zheng	1221	Kneading plane of the circle map
M. S. El Naschie	1235	Quantum measurement, diffusion and Cantorian geodesics

VOLUME 4 NUMBER 8/9

1994

SPECIAL ISSUE

Nonlinear Optical Structures, Patterns, Chaos

EDITORIAL INTRODUCTION

L. A. Lugiato	1251	Transverse nonlinear optics: introduction and review
----------------------	------	------------------------------------------------------

OPTICAL PATTERNS

J. B. Geddes, J. Lega, J. V. Moloney, R. A. Indik, E. M. Wright and W. J. Firth	1261	Pattern selection in passive and active nonlinear optical systems
----------------------------------------------------------------------------------------	------	-------------------------------------------------------------------

KERR MEDIA

M. Brambilla, A. Gatti, L. A. Lugiato and F. Prati	1277	Spatio-temporal structures from four-wave mixing and phase modulation
R. Neubecker, B. Thuering and T. Tschudi	1307	Formation and characterization of hexagonal patterns in a single feedback experiment
A. J. Scroggie, W. J. Firth, G. S. McDonald, M. Tlidi, R. Lefever and L. A. Lugiato	1323	Pattern formation in a passive Kerr cavity
M. Tamburrini, E. Ciaramella and E. Santamato	1355	Hexagonal beam filamentation in a liquid crystal film with single feedback mirror
G. Vitrant and J. Danckaert	1369	Suppression of modulational instabilities by optical transport in nonlinear Kerr-type resonators

OPTICAL BISTABILITY

M. Le Berre, A. S. Patrascu, E. Ressayre, A. Tallet and N. I. Zhelznaykh	1389	Spatial patterns in a passive ring cavity with atoms
G. L. Lippi, T. Ackemann, L. M. Hoffer and W. Lange	1409	Transverse structures in a sodium-filled Fabry-Pérot resonator—I. Experimental results: symmetries and the role of the incoupling conditions

G. L. Lippi, T. Ackemann, L. M. Hoffer and W. Lange	1433	Transverse structures in a sodium-filled Fabry-Pérot resonator—II. Interpretation of experimental results
Yu. A. Logvin, A. M. Samson and V. M. Volkov	1451	Spatio-temporal light structures in a chain of bistable two-level medium thin films
M. Sauer, J. Leonardy and F. Kaiser	1461	Spatio-temporal chaos due to attractor-merging in an Ikeda-like system
M. Tlidi and P. Mandel	1475	Spatial patterns in nascent optical bistability
LASER DYNAMICS		
Z. Chen, N. B. Abraham, S. Balle, E. J. D'Angelo and J. R. Tredicce	1489	Space-time dynamics in the transverse patterns of a laser from a model not restricted a priori to a few modes
G. K. Harkness, J. C. Lega and G.-L. Oppo	1519	Correlation functions in the presence of optical vortices
L. A. Melnikov, I. V. Veshneva and A. I. Konukhov	1535	Transverse pattern dynamics in a short-pulse mode-locked solid-state laser
K. Otsuka	1547	Gain circulation and transverse effects in antiphase laser dynamics
B. Ozygus and H. Laabs	1559	Gain-induced coupling of solid-state lasers
SEMICONDUCTOR LASERS		
F. Brown de Colstoun, G. Khitrova, A. V. Fedorov, T. R. Nelson, C. Lowry, T. M. Brennan, B. G. Hammons and P. D. Maker	1575	Transverse modes, vortices and vertical-cavity surface-emitting lasers
O. Hess	1597	Spatio-temporal complexity in multi-stripe and broad-area semiconductor lasers
Hua Li, T. L. Lucas, J. G. McInerney and R. A. Morgan	1619	Transverse modes and patterns of electrically pumped vertical-cavity surface-emitting semiconductor lasers
F. Prati, A. Tesei, L. A. Lugiato and R. J. Horowicz	1637	Stable states in surface-emitting semiconductor lasers
LASERS WITH INJECTED SIGNAL		
M. Georgiou and P. Mandel	1657	Transverse effects in a laser with an injected signal
LASERS WITH SATURABLE ABSORBER		
A. Barsella, P. Alcantara Jr, E. Arimondo, M. Brambilla and F. Prati	1665	Dynamics of transverse patterns in a laser with saturable absorber: model and numerical analysis
